Give your innovation a kick start with our project plan service!

You may want to launch a new product, implement an invention, realise a promising concept... and need some help to get started?

Then please consider the benefits IBDD can bring to you with its professional and experienced project plan service.

You have the skilled people but want to be sure you have the good project team? Or give the brilliant but somewhat preliminary idea the desired, 'down to earth' sharpness and focus?

External expertise needed, e.g. in technology of communication?

After your idea is cast into a solid plan that considers the potential value, the costs, the risks and the resources needed, realisation and profitability may be much closer than you had ever imagined. Let IBDD empower your team with just that little help it needs to be aligned, dedicated and committed.

Contact Niels Flach for an inspiring telephone call with an eye on the potential of your idea. Do it NOW, it is free and without obligations!

Dr. ir. Niels Flach is a chemical engineer with skills in materials science, polymer chemistry, organic chemistry, biochemistry and pharma, analytical chemistry and process technology.

He has gained senior experience as a programme manager at the Dutch Separation Technology Institute. This institute is a public-industrial cooperation. It was set up in order to speed up open innovation by combining the skills of public and private R&D professionals with a focus on sustainable and profitable applied chemical technology.

For more information on IBDD (in Dutch) and a CV of Niels Flach, see www.IBDD.nl
